OBAFEMI OGUNMOKUN

Fullstack Engineer

A Fullstack engineer with 6+ years of experience, I have successfully delivered high-quality solutions in diverse industries, including financial, education, project management, and consulting. I am passionate about leveraging technology to drive innovation and improve user experiences.

WORK EXPERIENCE

Lead Engineer   Oct 2021 – Present

Relentless Persistence Inc., WA, USA

- Spearheaded the design and development of the SprintZero app, employing best software engineering practices.
- Conducted in-depth research on cloud technologies to identify optimal solutions that would enhance the functionality and performance of the SprintZero app.
- Collaborated closely with the project management team to contribute to strategic planning and ensure project milestones were achieved.
- Demonstrated meticulousness in documenting codes and technologies, enabling seamless knowledge transfer and efficient maintenance.

Fullstack Engineer   March 2020 – Dec 2020

Nativshark, Fukuoka, Japan.

- Played a key role in developing the core engine that powered the NativShark platform, employing sound software architecture principles.
- Conducted extensive research on cloud technologies, leveraging findings to optimize and enhance the NativShark platform.
- Contributed to project management planning, ensuring alignment with business objectives and timely deliverables.
- Ensured comprehensive documentation of codes and technologies, enabling effective collaboration and future scalability.

Software Developer   Sept 2018 – Feb 2020

Lopworks Limited, Lagos, Nigeria

- Demonstrated expertise in API management, utilizing IBM API Connect and Tyk to streamline and secure communication channels.
- Leveraged Vue.js, React.js, and Elixir to build scalable applications, implementing robust software architecture patterns.
- Led the planning and development of applications, ensuring alignment with client requirements and industry best practices.
- Conducted comprehensive training sessions for clients' staff, empowering them to effectively utilize various technologies.

Web Developer   June 2016 – April 2018

Enovait, Lagos, Nigeria

- Created dynamic and user-friendly websites tailored to meet clients' specific needs, employing modern web development frameworks.
- Developed custom PC applications, ensuring seamless user experiences and optimized performance.
- Demonstrated proficiency in installing computer system software, ensuring smooth operations and compatibility.
- Facilitated training sessions for fellow employees, enhancing their skills and knowledge in software development practices.
